metter.

Neither the word "entertainment nor" enjoyable " ia meant to be in any way condescaoding. I can imagine, only too well, plays about the Freoch Revolution which were meant neither to be enjoyed oor entartaining. The Théâtre du Solail company, the continued use of transfer to the continued use of t to be enjoyed oor entartaining.
The Théâtre du Solail compeny, who devised thia piece as a collective operation under the guidance of Ariane Mnouchkine, clearly meen it to be both. "Les imperatifs du speciacle," says a note in the published text, are "foire riva... être cluir." The result is a performance that left me almost sbaking with excitement.

The avents of the revolution once. Only Marat bolds out for the continued use of émentes populaires, which bave been the means by which every positive gain has been made till then. A typically visual moment shows him driven back before three deputies holding, like a snow-plough, a black flag bearing the sinister legeod ORDRE.

But if I began to recount all tha fine visual moments in this truly superb production I should

tha fine visual moments in this truly superb production I should are followed actually as fer as the summer of 1791, when the markable is that in a play that King made bis unauccessful attempt at flight and Lafayette atyle from pantomime to ordered the National Guard to fire oo an unarmed crowd in the Champ de Mars. But mostly lt deals with the events of 1789. It presents them in the simple, primary-coloured forms they brought back from Versailles by would have bad for the unthough there is a gradual in-actress effortlessly balances one crease in sophiatication as the sword on another, point to point, cheals with the events of 1782. It. The soormous puppers represents them in the simple, seeting the King and Queen primary-cloured forms they brought beak from Versalite by the primary that the properties of the primary that the primary th

This superb eotertainment fits a little tightly into tha Round House, but once in, the cooceotration makes it aven more exciting than it was in tha desert spaces of the Cartoucherie at Vincennes. The five independent stages, binked by raised catwalks, are placed more or less equidistant around the circular floor, just inside the balcony; the audience the balcony; the audience the was a bank of seats; there is one at tha Round House too, but I doubt if you can see much from it. In any case, standing among the prometal form the aetiog area makes everything much more immediata and enjoyahla. Only the lighting seems to me aignificantly less eatisfactory than at the Cartoucherie, and that not enough to metter.

Neither the word "entertain—

With the taking of the Bastille, tha people are at lest fully involved. This is an absolutely marvellous passage. Io the actors move among us on the floor, incitiog ue to join the incurrection. At first they whisper; thair speeches become louder and louder until in all directions you can bear volces. Oo one of tha atages, a man brings the news of the Bastille, and on all the steges we see symbolic representations of light from every availabla lantern, and on all the steges we see symbolic representations of the conquest of tyranny, all presented in the style of aideshows at a fair, while the music blares out the Entry of tha Gladlators.

From that polot onward tha Revolution is in decline. Reforms are misused, there is endless are misused.

Wagery of the Goya original. Not clan and mercurial wit that ia to "Tantalo" life he were more implicit in the male role. But the gallant and less of a bore, she general feel of the staging is would come to life again), in right: happy, ebullient—a sparkwitch Hendrik Davel dances with lace to be staging in a pas de trois from Brenda a dead beloved, Marion Teit. Last, Nicholas Johnson and Ross's imagery is excellent; Donald Kirkpatrick—and danced the man manoeuvres the loert by the company with an air of thingse in a pas de deux sunny enjoyment. Bouquets to all that has an extraordinary concerned.

CLEMENT CRISP

Strike and Andrea Durant. In "No te escaparas" (No one and Idzikovskl; with Merla Park ever escapes who wants to be in the lead, the brilliant writing caught) Patricia Ruanne is the for Markova is safe, and beautinevitable fate from two meets her fully done. I am less bappy about the vitable fate from two mee, but Desmond Kelly, who, is unfail-Ross's realisation misses the ingly clegant, but who misses the savagery of the Goya original. Not clan and mercurial wit that is

dusty files in a National Youth
Theatre office.

It draws closely for inapiration upon that other—tauter and bonier—drama of nuptial bloodletting. Lorca's Blood Wedding. In place of the tan tablelanda and cectus trees of Spain Terson gives us a corner of Bedfordshire blasted by the M1. Bernerd Culshaw'a set of sitting-room suites has en areb of motorway for its symbolic ceiling, end the scenes are violeotly punctuated by stereophonic indoorwey roar over our heads.

Agalost this new background

The motor domioates the lives of the chatacters; a baby's lullaby is the old Esso jingle. The dialogue repeatedly tells of gwod farmiog land amothered to make a concrete maze. As a result the characters seem improbably limited in intereste and too evidently the creatures in a playwright who bas decided beforeband what their end abail be.

Terson's talent shows itself the stemplate and has the lovers talking about girls be-Agalost this new background lovers talking about girls bethe predicement of Terson's coming women or introduces, characters is the same as with the nasty star-party games, Lorca's: childbood aweethearta a readily believable reason for who marry other people. Dashing the girl's elopement. Otherwise Benny (John Nolan) can burtle off on his 650 Norton when the older generation, to Avis Bunnwhines of his wife become too much. But little Roadile from Joseph O'Connor quirkily maniethe petrol pump will obtain no such relief whan she has married berself to fat Doug, the lorry manager. To save her ing spring onions with chickfrom a fate nastier than death weed. Agalost this new background lovers talking about girls be-

The state of the

Shortage keeps hide prices firm

bas resulted in a shortage of available hides and firm prices.

At the Leeds bide auction yesterday, prices were reported alightly firmer, and the numbers on offer cleared well. Second clear ox hides of 26.30.5 kilos realised 15-2p a kilo agaiost 15p at Manchester the previous day and 14.5p a month ago. Cow hides under 25.5 kilos were priced at 16.3p against 16.1p that previous day and 15.4p a mooth ago. The Corporation has gone a were granted loans in the midlittle way lowards liberalising its 1960s have been reported to be previous day and 15.4p a mooth ago.

Hide trade sources attribute a reduction to cattle slaughterings, not only in Britain but on the Continent too. Here the mild autumn has enabled mild autumn has enabled farmers to continue grass feed-ing, instead of "varding" their rattle and feeding them on grain, while depletion of the dairy herds which has already been accompanied by the disappearance of the EEC's butter mountain has also reduced the number of cattle available for slaughter.

l Hides are very much a hy-product of the meat industry rather than an end-product in

LIVERPOOL—Spot and shimment sales amounted to 857 metric tons, bringing the total for the week to 1.529 tons, reports F. W. Tattersall, Further interest was shown in a wide range of varieties, chiefly from the Middle East. Compileations affecting deliveries of new crop American added ofitake.

The market was weak under the weight of heavy offerings, reports Gill and Indius. New lows compared with recent years were recorded and the market ended the day at its lowest.

poration yesterday anoconced a free loans over 60 years from the cost of farming is rising new sbort-term loan for farmers the Ministry of Agriculture astronomically. The loans are by new sbort-term loan for farmers the Ministry of Agriculture. astronomically. The loans are by as an addition to their long-term Theae advances, at present the Corporation's constitution totalling sizes. The new loan will be vested io gilt-edged securities to tenant farmers have to depend of 8 to 10 years duration and the form the backing for the deben-on banks and other sources for rate of interest at present will be tures raised to finance the farm working capital, as do formers offered for long term loans.

The new loan will be repayable tures raised deben-tures totalling sissm. at interest at the eod of the period, unlike existing loans which are rapay-leading sissm. at interest rate of instalments over the life has granted total loans sizesm.

At this time too when banks of the loan. The interest rate on over 4m, acres. Loans at present the Corporation's constitution totalling sizesm the component to open depend to the deben-tures rate on over 4m, acres. Loans at present the Corporation's constitution totalling sizesm the inmitted to owner occupiers; the constitution totalling sizesm the constitution the constitution the constitution the constitution totalling sizesm the in-limited to owner occupiers; the constitution that the constitution that the constitution that the constitution the constitution that the constitution thas a strategy and the constitution that the constitution that the

of the loan. The interest rate on over 4m, acres. Loans at pre- are becoming more liberal in will remain the same right sent outstanding total £177m, to their lending, and abort-term through the currency of the loan. 11,000 farmers secured on 2.3m, interest rates are lower than through the currency of the loan. 11,000 farmers secured on 2.3m.

The "Indian summer" which bas enabled farmers to defer the annual decision whether to overament their cattle or slaughter them for beef in the autumn, bas resulted in a shortage of the sum borrowed by increased the recent credit squeezes. But through the currency of the loan. 11,000 farmers secured on 2.3m.

The Corporation has been particularly belieful to farmers who to the banks as long as they can. The Corporation would, it is understood, like to become more being asked by banks to make their overdrafts during prospect of being able to repay the recent credit squeezes. But an opportunity for a change in its

Efficiency of food industry underlined

By Our Commodities Staff THE food industry is one of the most efficient and cost-conscious in Britain, Mr. S. R. M. Wade,

alleged excess profits.

Tuesday, Kennecott Copper immediately, then food content to consider all aspects of the Comptroller-General's ruling a similar appeal.

Despite a report on Monday months last year. Yet food price transport charges rose that the industry had issued by the Chilean comptroller rises followed by wage demands on the trade ahould be catered for in the future.

The excess profits deductions

Tuesday, Kennecott Copper immediately, then food content to consider all aspects of the transport situation with a view to making recommendations on bow months last year. Yet food price to transport situation with a view to making recommendations on bow months last year. Yet food price in the trade ahould be catered for in the future.

The concern centres mainly on the shipping side, and the anything for the expropriated almost come to helieve that it apparent absence of any plans for new livestock ships in the formediately.

N.Z. lamb takeover threatened

WELLINGTON, Oct. 13. THE New Zealand Meat Board to-night threatened to intervene in trading of New Zealand lamb to maintain prices above

the threatened slump figure. Forecasts that the new season's payment to farmers, to be announced later this week, will be down to NZ\$4 per lamb brought moves by the Meat Board to take over the sale of lamb from the meat companies. The Board said that if the

meat companies, including British concerns, dld not offer a higher price to farmers, tt would intervene to take over lamh and sell it or inject cash into the industry to maintain the farmers' payment. There were earlier sugges-

tions that the Board would buy up the first 2m. lambs killed in the new season which begins this week. The payment for farmers, usually annunced in advance, has been delayed pending talks between the industry, Government and the

Meat Board. The reasons for the threatened low price include a beavy 28 per cent. increase in freight rates, the levy imposed on N.Z. lamh by the British Government. and the carry-over of stocks from last season.

Concern over Irish live

Challenging the farmers' claims to privilege

ing of the Farmers' Club in on international trade.

London yesterday, Professor Very few economists would lt was also difficult, be asld, Dennis Britton of Wye College, accept that the attainment of the for an agricultural economist to questioned some of the alogans greatest degree of self-sufficiency accept the notion that the British and dogmas that have been in food supplies was a desirable farmer should bave the first popular among British farmers. objective of British agricultural claim to the British market. Speaking under the title Agri- policy. cultural Economists and Farmers
—Friends or Foes? he asid
economists could not agree with
the principle that "what is good tages in growing ce

the principle that "what is good tages in growing certain foodfor British agriculture is good suffs in other part of the world, for the nation" If this meant that resources should be transferred via the Treasury from other sections for that reason alone. Only if it could he shown that this be justified.

If there are natural advanting consumer.

It was true that a farmer needed some assurance of marned were given without reference to the cost of alternative supplies, some misplaced investment was likely to occur.

He questioned too the often that "what is good tages in growing certain food-needed some assurance of marned were given without reference to the cost investment was likely to occur.

He questioned too the often that "a farmer needed some assurance of marned were given without reference to the cost investment was likely to occur. e justified.

simply an estimate of what was simply an estimate of what was hought to be technically feasible yields per cow or per acre, it the abort term, but were receptather than a target which was did not seem that the average tive to looking at their industry declared to be economically in Britain was any higher than in the context of the whole justifiable in every particular in some other countries, nor community.

95 of Britain's top 100* companies operate **BUPA Staff Groups.**

With such a list of companies, we should be able to provide you with a few businesslike reasons for forming a BUPA Group of your own.

Let's begin with around 10,000 - that's the number of organisations currently operating

BUPA Groups.

And let's add that BUPA group protection comes tailor-made to fit your company's particular needs.

No firm is too big, and very few are too small -it takes only 10 people to form a BUPA There is a generous discount for group membership, and a company's BUPA contribu-

tions are normally tax-allowable.

95 of Britain's top 100 companies will tell you that BUPA makes good healthy business sense.

Your best way to budget BUPA for private medical care

BUPA, Provident House, Essex Street, London were sax Fill Please send me more information about BUPA Groups (BLOCK CAPITALS, PLEASE)

made to-day, the line will be operated by Lioyd Brasileiro, the leading Brazilian shipping company, and will be financed for the first two years by Sunanam, the Government agency in charge of shipping.

Last July, on a two-week visit, Gibson Barbosa offered \$1mm credits to each of the countries he visited—Guatemala, El Salvador, Honduras and Costa Rica—for the purchase of Brazilian goods.

BUENOS AIRES, Oct. 13.

But the fact Lanusse, whose attanding at home bas been greatly enhanced by the two generals who commanded the First Armoured Cavalry rocced to Antofagasta in orders to the Olavarria and Azul designed to bring Argentina into army garrisons which, surclesser alignment with these West rounded by forces loyal to President Saturday morning. But the fact Lanusse, whose attanding at home bas been greatly enhanced by the two generals who commanded the First Armoured Cavalry rocced to Antofagasta in orders to the Olavarria and Azul designed to bring Argentina into army garrisons which, surclesser alignment with these West rounded by forces loyal to President Lanusse (be is Army Chief Brazil as well), surrendered on the Country for the fact Lanusse was a surleval province's Olavarria and Azul designed to bring Argentina into army

BY ROBERT LINDLEY

Sbortly before leaving with a group which included several Argentine industrialists, President Lanusse delegated bis seven month-old mandate to Brigadier Carlos Alberto Rev. Air Faces Carlos Alberto Rey, Air Force Dictatorial The American Stock Exchange announced a seat sale for \$80,000 to-day, unchanged from the previous sale on October 6. The current market is \$77,000 bid, \$110,000 offered.

Reuter by many to signify how utterly the anti-Lanusse coup failed, in as much as there is at least circumstantial evidence that Air Force officers were implicated in some degree in the rebellion—although no Air Force units actually rebelled.

Moreover, three more army generals. Marcelo Levingston wbom Ger Lanusse deposed and replaced as President in March, are being beld for questioning. An undisclosed number—reliably estimated at over 50—of army and air force officers are all as air force officers as well as civilians are being beld in greater Buenos Aires and in the

BUENOS AIRES, Oct. 13.

central province of La Pampa. Among the civilians detained is Roberto Roth, the "one-man legislature" of Gen. Juan Carlos legislature" of Gen, Juan Carlos Ongania wbo as President from mid-1966 to mid-1970 was prime instigator of the "Argentine revolution." Dr. Roth's detention, in Buenos Aires Villa Devoto Prison, bas fed speculation that the failed coup leaders wanted to restore a more dictatorial regime.

Also suggestive of what might bave been the objectives of this coup which never consistently explained itself is the detention of Father Julio Meinveille, a Roman Catholic priest who has authored aome of Argentina's more scurrilous anti-semitic writings. lings. Whether or not Father Meinveille—or Dr. Roth for that matter—were actually involved in the coup is not known. But the Lanusse Government, almost from the first moments of the coup, has been successful in con-vincing almost all the political parties, the Peronist-dominated General Confederation of Labour and a wide range of non-political groups as well that it was "fascist."

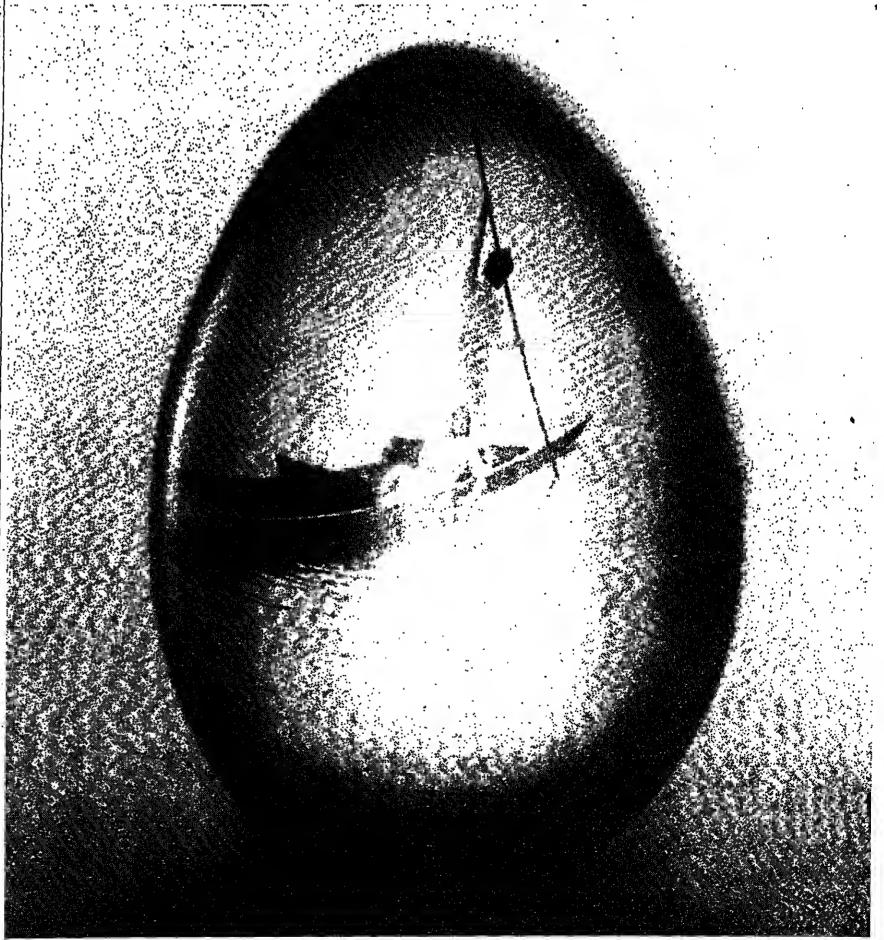

The coup, according to Government propaganda on radio and television. was "directed not against the Government but against the Argentine people" snd, as such, against President Lanusse's call for absolutely free elections on March 25, 1973. Many observers here see Gen. Lanusse's candidacy—undeclared so far—for constitutional President in those elections as much more likely of being successful now than they did before the coup. These observers say that lormer dictator-president Juan Peron, exiled in Spain, sbould now be much more disposed to President Lanusse's "Great President Lanusse's National Accord and even the Lanusse candidacy.

Trinidad to help Zambia

When international businessmen came financing last year, we sent them all away.

With 50,000 letters of credit totalling over \$1.5 billion.

Our objective: a steady flow of world-wide credit for exporting

U.S. products and importing foreign goods.

The loans ranged from multi-million dollar credits demanding great quantities of long-term financing . . . down to relatively modest amounts of several hundred dollars.

For example, Manufacturers Hanover recently opened a \$50 million letter of credit to build and equip an atomic power plant in Japan. We also negotiated a \$15 million loan for three foreign airlines buying American-made jets. To get these credits off the ground, we worked closely with the Export-Import Bank of the United States.

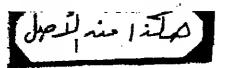

Other typical export transactions included \$13,000 for a car manufacturer sending vehicles to Lebanon, and \$18,000 to a Midwest miller supplying wheat to Guatemala.

During the first six months of 1971, our average outstanding credit for import-export transactions totalled approximately \$1 billion.

What it all adds up to is progress. Help in getting U.S. payments into balance. Help for our customers growing overseas.

Manufacturers Hanover does big things internationally

Woolworth can afford to smile. They got NCL to do the fleet planning.

Every day, over 2 million customers walk into 650 Woolworths in the Southern half of England and walk out happy.

Early next year, many of the goods they buy will have come to them via one of the most advanced warehousing and distribution complexes in the U.K.

Past experience gave Woolworth confidence to call in National Carriers Limited, early in 1970, to work with them on the new Swindon distribution project.

What has been devised is a highly practical system in every detail. Right down to an on-location examination of the physical access of every store before deciding the distribution system and size of vehicle for the fleet.

It's also flexible and forward looking.Capable of handling an increasing percentage of bulk collections from manufacturers as well as bulk imports.

And it will save Woolworth a lot of money. Throughput of goods from warehouse to store will be three times as fast as it is now. With all the attendant

This is the kind of expertise that NCL has been able to offer Woolworth. It's the kind of service you can expect from NCL too. Whatever your size.

Contact your local NCL Area or Depot Manager - the number is in the book - or Harry Kinsey, Managing Director, National Carriers Limited.

NCL House, 21a John Street, London WC1N 2BX. Tel: 01-242 9050 Ex. 378.

Maudling: No chance of death penalty

THERE was oo prospect of Parliameot bringiog back the death penalty, Mr. Reginald Maudliog, Home Secretary, said at the eod of a debate on crime and punishment.

Delegates went oo to call for the resint reduction of the death

the re-introduction of the death penalty for the murder of police and prison officers. Mr. Maudling said it was

wholty undeniable that crime was growing seriously. The fact that it was growing faster in some for complacency, hut a dire

that is perfectly true.
"What worries me is the continuing growth of crimes of violence and the terrifying pro-portion of crime committed by there is no independence. In an young people in their teena. We age of super powers, very little fully recognise and ahare the attention is going to be paid to public concern in these matters."

Pride

There were three answers: prevention, detection and punish-ment. A large part of prevention was stiffer penalties which dewith University) described the terred people. But this was by I hope never will be, a matter of ment's refusal to restore capital market as Mr. Heath's "pound in no means the only answer—" one party or government policy. punishment."

"He knows and we all know was generally aome reaction by "I must any I cannot ace any incentive to kill to avoid detection that the majority of the British people are against cotry. He often a hrush with the law hy its decision in this matter. I Mr. Ivan Lawrence (Peckham) betrays the nation and bis trust the young was brushed off lightly can any thin with the more consaid that capital punishment was a described of the people. "But is it

with this folly."

"Clearly the most enecuve votes are in the detection, and though that it should not be proper for the State to decree that he who lad two important assets—both On punishment, he said: "The takes the life of another should be detected in the state to decree that he who later than the courts forfeit his own. But I respect which discussing the Market, conference bad two important assets—both of which they owed above all to Mr. Heath himself.

"One is that we are free to choose our course in this grave matter without fear or favour. as our own judgment and contact of the forces of law and order were relating to firearms, an area of the forces of law and order were relating to firearms, an area the forces of law and order were relating to firearms, an area the forces was

as our own judgment and conscience dictate. MPs have not merely been permitted, but expressly enjoined by Mr. Heath to do just that, and to vote accordingly."

"We think and act, therefore, under no constraint of party or personal loyalty. Those who oppose British entry, do so in the assurance of being no less loyal."

"I don't think it is generally realised how severe are the penalities that are already available, especially for crimes of popose British entry, do so in the assurance of being no less loyal."

"I don't think it is generally realised how severe are the growth of crimes was where the growth of crimes was where the growth of crimes was wery disturbleg.

"If we are to have capital punishment let us have it for carrying or using firearms was able, especially for crimes in the maximum sentence for roblems."

"I intend to see that the maximum sentence for carrying with the forces of law and order were relating to firearms, an area where the growth of crimes was very disturbleg.

"If we are to have capital punishment let us have it for carrying or using firearms was able, especially for crimes in the maximum sentence for roblems."

"I intend to see that the maximum sentence for carrying with the forces of law and order were relating to firearms, an area where the growth of crimes was very disturbleg.

"If we are to have capital punishment let us have it for all those who murder for profit," here were are the growth of crimes was very disturbleg.

"If we are to have capital punishment let us have it for the maximum sentence for roblems."

"If we are to have a carrying or using firearms was the maximum sentence for roblems."

"If we are to have carrying or using firearms was the maximum sentence for roblems."

"If we are to have a carrying or using firearms was the maximum sentence for roblems."

"I intend to see that the maximum sentence for carrying or using firearms was the carrying or using firearms are already avail-alled to the profit," and the carry in the maximum sentence for roblems.

Mr. Maudling listening to the law-and-order debate. "One of the great causes of the growth of crime is the decline in parental authority." he told the conference.

of the great causes of the growth of crime is the decline in parental moved against capital punish penalty for murder had removed authority."

In the old days when a child by a very large majority to bring had a hrush with the law there it to an end.

The absence of the death punish penalty for murder had removed ment, and finally voted in 1969 the unique character of this by a very large majority to bring particular crime—it had given the professional criminal the

A tightly-buttoned customer is unlikely to unbelt.

Nothing saps the adventurousness of the British more effectively than the cold.

So if the air in your store is icy, your male customers will

be discouraged from trying or buying anything new. This could do bad things to your sales of spring finery. So if there is the faintest chance of it happening, through deficiencies of boiler or boilerman, you would be commercially wise to consider a change of fuel. Gas makes excellent commercial sense.

It needs no storage. It can be completely automatic, running unsupervised from autumn to spring. It requires no deliveries and there is little maintenance.

Changing over to gas is usually simple, quick and reasonable in cost. (If you want it, we may be able to arrange credit.)

And you have the added satisfaction of paying for the stuff only after you've used it, not before.

Send the coupon, or ring the Commercial Sales Manager at your local gas board for a copy of our free booklet-'Gas will make your business more efficient'.

It will certainly do that. It will also thaw out your customers' winter wallets most effectively.

fashion. Yesterday, leading lights in any way a Government spokes sanding and finishing belts, tehd in the British Software Houses man. Mr. Hall indicated that had been said by materials such as aluminium are nothing that had been said by materials such as aluminium are nothing that had been said by materials such as aluminium are being finished.

A company facing this problem development contracts to any when working on aluminium to Dataskil. With his Dataskil hat on he represents about £2½m. a year of the total U.K. software house, as well as when working on aluminium lidus in the proposed support of the total U.K. software house, as well as when working on aluminium to Leavite. Of Bromley Hayes, lidustry's court and it was now in Lichfield, Staffs., so it developed the total U.K. software have added any one foot

out what there is in it for software companies.

The crux of the matter seems to he that bere is on the one hand a reasonably successful manufacturer who is involved in every area of computing operations including bureaux and software. On the other hand, some of the top software houses in the U.K. have handled systems and software packages for machines and complexes of machines far larger than anything that ICL bas ever put together. They are fully justified in saying that nothing must be done that in any way could detract from the fact that in Britain are groups who have solved problems that have defeated the largest U.S. computers of the companies in the case of ICL.

In some of the two of the matter seems to the one and a reasonably successful that in the way of the company in shall be determined to be in the way of the company in shall be determined to be insist on bogging the lot. But from Government, it would not insist on bogging the lot. But insist on bogging the lot. But of the way of the company in shall all read to be expressed in the way of the company in shall be in the way of the company in shall all read to be expressed in the way of the company in shall all read to be expressed. The would not in the four U.K. software companies in Europe if ICL did not in the Europe if ICL did not in the France and Germany.

It came somewhat as an anticular to the largest U.S. componies when a spokesman for the gather. Atkinson, reminded the gather.

Atkinson, reminded the gather.

TIresearch and tailor-made aluminium

Il advanced engineering in action! A The elucidation of the heat-transfer mechanism series of investigations at the Chalfont involved physicists and mathematicians, and Aluminium Co Ltd in Buckinghamshire is techniques. The design of casting equipment concerned with matching the properties and associated water cooling devices called of aluminium to customers' needs. Two for highly skilled engineers and the application aspects of the work, described here, of water modelling; and studies into the effect illustrate the advanced technology of variation in casting parameters on metallurnecessary in 'tailoring' aluminium.

Optimisation of cast structure

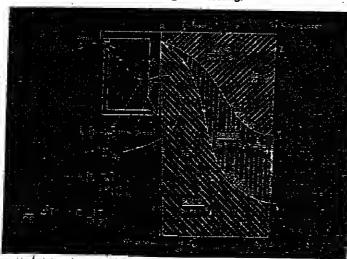

Semi-continuous casting is standard practice the industry and, unless the melt is inoculated grain-refined to produce a fine-grained equiaxed structure, the process has an inherent tendency to grow massive columnar

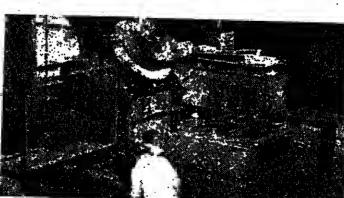

In the casting operation, the surface of the st material is heavily chilled within a water-oled casting die. This forms a shell containing liquid metal which is subsequently lozen by direct impingement of the cooling lozen by direct impingement of the cooling ledium onto this solidified skin. The rate of at extraction controls both the solute segsation and the size and distribution of second

se precipitate particles. udies of the mechanisms underlying this ocess have been undertaken in the laboratory and on pilot scale and have called for the Plication of a wide range of disciplines.

Technological Centre of The British the use of mathematical models and computer gical structure demanded a full range of metallurgical expertise.

This approach to semi-continuous casting has For a material scheduled for a critical application, made possible better control of the essential there is need for control over cast structure structural features in the casting. This in turn since the pattern of segregation and grain has led to the development of products with size distribution set up by the casting process improved surface appearance after etching or Al-Zn-Mg alloys can persist through to the final fabricated anodising, and to the improved control of the Alloys of the Alloys

Experimental casting facility at British Aluminium's Technological Centre.

improved surface appearance after etcning or anodising, and to the improved control of the forming quality of the metal in customers processes.

Mathematical model for simulating billet casting.

Alloys of the Al-Zn-Mg system are becoming increasingly recognised as valuable general engineering materials. The medium strength alloys, with proof strengths up to 30 tons/sq in, are readily weldable and have pronounced natural age hardening characteristics.

However if produced without careful compositional or production control, they may be susceptible to stress corrosion cracking. The Technological Centre of British Aluminium has I contributed extensively over a number of years an advanced engineering group to basic research in this field. Using mainly optical and electron microscope techniques, studies have led to a good understanding of the hardening mechanism and the effect of variation in composition or processing schedule on structure and properties.

In one particular application, the research provided the basis for development of a material for air-transportable military bridges. This had the necessary weldability and age-hardening

characteristics but with freedom from stress corrosion in both the welded and unwelded conditions.

The work has now been extended to the production of alloys for engineering applications in the civil field.

The progressive development of these Al-Zn-Mg alloys shows how the application of basic materials science can help to eliminate weak points in otherwise attractive materials—once again 'tailoring' properties to meet user requirements.

This challenging work is just one example of the many types of fundamental and applied research undertaken throughout TI—a £300 million group of over 100

THE DEVELOPMENT of a corps of professional personnel officers in local government could be the principal outcome of a new training recommendation published yesterday in booklet form by the Local Government Training Board.

Training Board.

At present, few local authorities have central personnel or establishment departments with wide responsibilities for personnel matters. In looking forward to the "growth of a corps of professionais in local government" the recommendation states they should not be left to work "in an amateur environment."

The recommendation is concerned with both the training of new entrants to personnel work in the manner of the manner of the decline in trade at Hull, the period last year.

A SERIOUS DROP in tonnage Other traffic returns: Hull, driver's attention.

A SERIOUS DROP in tonnage Other traffic returns: Hull, driver's attention.

A SERIOUS DROP in tonnage Other traffic returns: Hull, driver's attention.

The laboratory has developed a special camera, called the eyemark camera, that records on film and displays on closed-cirtoned transport Docks Board.

The Board shows that the combined tonnage of the four ports has dropped to 18.2m., compared with both the training of cerned with both the training of period last year.

The recommendation is concerned with both the training of cerned with both the training of period last year.

new entrants to personnel work and with the oeed to set up appropriate training atrange ments for staff already engaged in this work. All personnel are recommended to study for the examinations of the Institute of Personnel Management.

proach w

on problem

Every lunchtime 67% of Britain's workers stage a sit down strike against the company canteen

This may seem an over-dramatic way of presenting the fact that the majority will sit down anywhere to eat but their company's canteen.

And at first sight you may think it is hardly your business. Yet consider for a moment why you have a company canteen. Isn't it to help raise afternoon output?

That's the theory.

In practice, there's an even chance that less than 33 workers in a hundred will think your canteen is attractive enough to use today.

(Will you, if you are free, be eating there?) The inescapable fact is that a canteen that's little more than a mid-day stoking station costs its company a good deal more than its subsidy.

And not only because a canteen can't spur output if People don't use it.

The popularity of a canteen affects absenteeism, staff turnover and the wages you pay, as well as your costs of recruiting and retraining replacements.

Avoidable losses on items like these aren't spotlighted on a balance sheet.

Yet you pay for them, just the same.

Which is why we think the canteen is not simply your caterer's problem.

Particularly as only a top man like yourself can initiate a change that freshens the menu, enlivens the service and makes everyone want to contribute more.

Surprisingly, this isn't as much a matter of money as exploiting the real benefits of frozen foods.

Perhaps this doesn't sound much like a revolution. Yet as part of a Smethursts system, look where it can It enables you to update your catering equipment without necessarily making a larger investment.

It frees up to 30% of your valuable floor space for production or administration.

It cuts your labour expenses by as much as 40%. It could even enable you to reduce your subsidy. These aren't glossy promises.

They are rounded down figures based on the findings of over 800 companies who have been using a Smethursts system for years.

If you are interested in benefits like these, contact Smethursts Foods Limited, the Catering Division of Birds Eye, at Walton-on-Thames, Surrey. The 'phone number is Walton-on-Thames 28888 (extension 470).

Smethursts, the start of a far better catering system

FINANCIAL AND ACCOUNTANCY APPOINTMENTS

A new appointment

$oldsymbol{Finance\ Director}$

in a high growth business

A leading firm in the mechanical handling industry requires a high level C.A., aged about 40, to manage and reshape the Finance function during a period of rapid Company growth and change.

The eppointment is a new one. Reporting to the Chairman, the Finance Director will he an ective. member of the top management team and will be directly involved in formulating all principal business decisions. Responsible for developing tha Finance function along new paths, his main priorities will include designing a powerful management information system, and advising the Chairman on Group financing and major economic and business appraisals

Currently earning about £6,000, he will almost certainly have worked in a high growth business and at the centre of a major company. He will have developed modern accounting and management information systems, have been involved in corporate strategic planning, be accustomed to handling financial negotiations, and have first hand experience of modern business techniques. Please write, in confidence, to John Hall, Ref. C421,

McLintock Mann & Whinney Murray, Management Consultants, 95 Southwark Street, London, SE1 0JA.

# No extra cheap flights to Far East

heen given a dispensation by the U.K. Government on an experimental basis, and this dispensa-tion has been extended to two Far Eastern airlines on a reciprocal basis for flights into Britain. Tickets to Kuala-Lumpur will be available for around £70 one way.

The other airlines, some of whom bave been operating on the routes as charter carriers for a decade, were very unhappy about the exemptions granted to BOAC and Britisb Caledonian. After a Whitehall meeting between the Department of Trade and Industry and airline representatives, they were invited to apply for exemption themselves. This they did, and have now been told that they will not be given equal rights because there Investigation the route.

A run-down of employees and production will take place between now and February and a Tube Investments spokesman and February and the Financial Times. CANNES, Oct. 13.

AT LEAST four independent airlines bave now been told that they will not be given cut-price flying rights to the Far East similar to those recently awarded to BOAC and British Caledonian. The airlines include Lloyd International, Dan Air, Britannia and Laker.

BOAC and British Caledonian have been given exemption to normal licensing rules for flights in April. Named Europa, it is expected to fly thoughout to Malaysia and Singapore. That means they can run flights on a charter basis at a low price, and both advertise and sell tickets direct to the public. Normal charter flights cannot be advertised, and no tlekets are officially available to non-group members.

The two favoured sirlines bave heen given a dispensation by the LK. Government on an experi-

manship of Mr. Michael O'Hallaren, commercial property contrespondent of the Financial Times. The speakers are: Mr. Ramon Greene, youn manighms director of the English and Commental Property Company Mr. Jeremy Assect a pariner of Mann and Co.: Mr. Andrees Breach, chairman of the Brisiol and West Building Society: Mr. P. Llord Roche, seneral manager of the Milion Keynes Development Comporation, and Mr. Neil Wates, managing director of Wates, Horchester Hotel, W., 9.28 a.m.

# Political attitude The British Junior Chambers

ment centres.

are non-party political. At election time no Chamber will support a particular caodidate, although it may well be that a number of individual members are working together for which ever cause they support. However, the BJCC does not abstain from politics and is always free with its advice for the Chancellor before he goes into his pre-Budget purdah. This is one of the few occasions when the BJCC will put forward pro-posals in the economic sphere; more usually it confines itself to study and information

To join a Junior Chamber will cost on average about £5 a year. The local branch keeps a proportion of this and the rest goes to the national organisation. Financing for more ambitious projecta such as the Honolulu expedition, tends to come from national and local industries who sometimes also pay the subscriptions for their employees, although membership is strictly individual with

Hnw all this theory works out in practice is largely the responsibility of each individual chamber. There is a high degree of co-operation throughnational and international levels and for easier communication and administration all JCs' activities are categorised. These categories include such topics as community development, economic affairs, education and youth, public relations and leadership development. Within this sphere each chamber can work ont its individual programme of meetings, lec tures, discussions and projects. For example, one chamber may be carrying out a traffic survey of the town in which it is base while a sister chamher in the next town is participating in the BJCC's ambitious project on international trade.

About 25 chambers taking part in this latter project and jointly they are trying to measure British export per formance; to compare the faci lities available to exporters in this country with those avail-

# The Junior Chamber of Horrors?

Some people have a horror of societies, clubs and such. And they tend to see Chambers of Commerce in the same light-because they don't really understand what they are all about.

Lloyds Bank encourages its managers and young executives to join Iunior Chambers of Commerce. We know how important it is to be involved with the community, especially the business community.

It's one way of keeping our heads out of the clouds, our feet on the ground, and our minds attuned to people's problems and needs. So we wish all Junior Chambers of Commerce continuing success.

# Lloyds Bank Limited

"All this" is the new factory that Frome Tool and Gauge Ltd. moved to some six years ago from their original premises in the market place. Peter West and his brother are directors. The company are precision engineers makers of special tooling and checking equipment - and have been with the Midland ever since Mr. West's father started the business back in 1949.

In Mr. West's own words: "Relations with the Bank have always been very happy. l see my local manager at least once a week and at important times in our development the Regional Director - and indeed a General Manager - too.

"The Bank helped with finance for the building of the factory, and their subsidiary,

Forward Trust, provided some of the capital for our expensive machinery." As an indication of the success of the enterprise. Mr. West explains that they now have as many as 400 jobs going through simultaneously, and are complete with their own drawing office.

The Midland would like to help you too. Your nearest Midland manager will be pleased to discuss any problems you may have, without obligation, of course.

Almost certainly, you'll find the Midland is your kind of bank.

# 14 months from now, you may be wishing it was 14 months ago.

Sometime between now and the 1st of January 1973, you'll have to decide whether or not to go into Europe.

If you decide yes, you'll need to have examined each market of each country in close detail. Which involves either buying existing research, or commissioning research totally specific to your product.

If you decide not to join in, you'll have to recognise the fact that Europe will come into Britain. Which means a re-assessment of your home market. And again, research will figure in this very strongly.

Setting up research takes time. Particularly if your product is a seasonal one.

That's why we are asking you to give yourself as much time as possible, by contacting the British Market Research Bureau (BMRB), or EMRB, its sister company which carries out surveys in Europe.

You'll be under no obligation to buy anything when you fill in the coupon.

You'll just be asked to spend a little time thinking about the future.

Which is a lot better than dwelling over the past.

Jack Fothergill, Managing Director, BMRB Ltd., or Paul Berent, Managing Director, EMRB Ltd., Saunders House, 53 The Mall, London W5 3TE.

Please tell me how you can assist my plans for the future.

# in Vero A hopeful message for the newspapers

BY TONY OAKIN

ONE OF the main reasons why television advertising revenue is going up faster than newspaper revenue is because the potential of the latter isn't heing properly exploited. Moreover, much of the exploited. Moreover, much of the fault lies with the creative people in agencies who tend to spply the same techniques and principles to designing newspaper sds as they do to television commercials.

These, al least, sre some of the These, al least, sre some of the conclusions to be drawn from the advice currently being given by 29-year-old Steve Sohmer, creative director of the U.S. Bureau of Advertising, the equivalent to the British Newspaper Publishers Association, the Eveniog Newspaper Advertising Bureau and the Weekly Newspaper Advertising Bureau all rolled into one. Sohmer, speaking to an one. Sohmer, speaking to an attentive audience of newspaper executives and agency creative staffs in London yesterday, is over bere at the invitation of British newspapers

# COMPANY NEWS + COMMENT

# Morris and D. Jones to beat £900,000

A PROFIT in excess of £900,000 for 1971 is forecast by Morris and David Jones, grocers and provision merchants. This would compare with the £578,000 of 1970.

The interim dividend is raised from 1.125p to 1.375p per 25p share; this represents one-third of tha 1970 total of 4.125p but does not necessarily indicate the level of the final.

## comment,

Green's recovery trend was avident in the second half of 1970 when pre-tax profits were 39 per cent. np at £236,000. However, this seems to be running out of steam if the profit projection for the current half is anything to go by, for a same again profit of £187,000 pre-tax for July-December would imply a fall of 19 per cent, in the second six months. With general capital equipmant spendgeneral capital equipment spend-ing not expected to pick up for another six months, there seam grounds for caution; and the market apparently agrees with that. Even after the rise of 14p to 178p vesterday the prospective p/e is 8.2 on normally taxed earn ings of 21.4p a share.

# Joncraig dividend

loncraig Holdings continues at a high level, mainly against for-ward orders, says chairman, Mr. J. M. Parnes. Tha Board intends **ISSUE NEWS** 

# 3 debenture stocks totalling £5 $\frac{1}{2}$ m.

Arrangements are in hand for group is headed by Merrill Lynch, the placing of three debenture Pierce, Fenner and Smith and Issues to raise a total of £51m. Goldman, Sachs and Co. issues to raise a total of £3½m.

New project at Chambers

& Fargus Chambers and Fargus has plans for further development of its business in a project which bas been fully investigated and should result in considerable increased profitebility, says the chairman Mr. James Fargus.

It will cost money but the return will be substantial, and will enable the company to make use of those Lime Street Mill buildings which have been "silent" for too long. Meantime, revenue is derived from seed crushing, edible oil

retining and compounds manufac-ture, with improvements in each department to assist production, reduce costs, and increase profit In the year ended June 26, 1971 profit expanded from £7,812 to £123,747, and the dividend is

raised from 21 per cent to 17 per cent. Turnover came to £2.53m. Meeting, Huli, November 5 at

## UNIVERSAL **PRINTERS**

Universal Printers proposes to change its name Corporation. The out that the existing name no longer reflects the main activities es in recent years the business has changed from almost exclusively printing to include packaging end publishing.

It is also proposed to amend the Articles to briog borrowing powers into line with modern practice. The effect would be to increase powers from £4,300,706 to

# Orion holds 7½% UNION CORPORATION

# for the year to June 30, 1971, after adjustment for minorities and interest charges relating to developments under construction, amounted to £436,182, against £433,169 for the previous year. It is pointed out that the sale of the shares of BPI Securities during the year removed a very substantial dealing profit which would have otherwise arisen in the year under review. This was taken as a capital profit on the sale, thereby reducing the amount of lax payable and contributing to the inercase in the net asset value to 171p per share on June 30, 197t, from 121p at the corresponding date a year previous. The dialdead is stored.

PROSPECTS of Bisbopsgate Property and General Investments for the aix months to the current year continue to be satisfactory says the chairman, Mr. H. N. Sporborg.

In the absence of any special adverse factor like Board expects to maintain the higher level of dividend recommended for 1970-71.

As reported on September 9, revenue available for distribution achieved sooner than originally for the year to June 30, 1971, after

Bishopsgate Property confident

This was then as a content from the sale, thereby reducing the amount of lax payable and contributing to the inercase in the net assel value to 171p per share on June 30, 1971, from 121p at the corresponding date a year previously. The dividend is stepped up from 3, 1971, from 121p at the corresponding date a year previously. The dividend is stepped up from 3, 1971, from 121p at the corresponding date a year previously. MING NEWS

# giant Vaal Reefs South is starting up

BY LESLIE PARKER, MINING EDITOR

marterly reports from the South African mines, those of the Anglo American. Anglo-Transvaal and space correction groups, conjunct the story of substantially higher cevenue from the sale of gold at premium prices in the free market and therefore of generally higher working profits. Of the Anglo American companies, Vael Reefs now includes a its results those of Western Reefs although the actual merger of these adjoining mines' operations did not actually take place smill September 20. It is stated to he progressing satisfactorily. The 1970-71 output was 20.346 tons. Bellambi Coal continues to export the major proportion of its production to Jepan under a long-term contract. At the expansion to an annual 8m. tons of iron ore is proceeding. In the expansion to an annual 8m. tons of iron ore is proceeding. In the expansion of CGFA which is 68 per contact of CGFA which is 68 per contact or in the state of the progressing satisfactorily. The 1970-71 output was 20.346 tons. This also means that the estimated 197t capital expenditure on vaal Reefa South has been increased from R15m. to R22m. (125m.), lergely as a result of expenditure previously scheduled for 1972 being brought forward. The VRS profits will be split as to Vaal Reefa 40 per cent. and Southwal Holdings 60 per cent.

President Brand confirms that its new uranium plant is not being commissioned for the time being. It can, however, be started up et short notice and the overall situation is to be kept under constant review.

The group's working profits including gold premium revenue are compared in the attached

The group's pre-tax profits are compared helow. They include gold premium income and sundry revenue. Those for Kinross St. Heleoa and Winka haak are high

## SUNGEL BESI'S DIVIDEND HOPE

Two years ago the Malayan tinproducing Sungel Besi was in a
cliff-hanging situation, but it has
since managed to climb back on to
safe ground. So much so that the
chairman, Mr. John Richardson,
was able to say at yesterday's
London meeting that "the much
improved profits for the past haif
year to September 30 lend
emphasis to my expectation that
dividenda will be resumed in respect of the current year."

So by next April shareholders

mot remain as a minority partner
in UTO.

Announcing its bid yesterday,
BET disclosed that it intaoded
paying total dividends on the
Deferred shares a lready issued of
2 per cect. in the year to March,
1972, against 20 per cent. in 19701971. Formal documents are to
be posted es soon as possible.

BIDS AND DEALS

# **BET** bids for Utd. Transport

DESPITE being turned down two years ago, British Electric Trac-tion is again bidding for the 83.1 per ceot. of United Transport Company not already owned. Four S Eurodollar loan of R3m. (£1.88m.)
has thus been raised, primarily for the financing of these stocks. Shipments of conceotrates and cohbed ore for the nine months in September 30 total only 10.035 tons against 20.198 tons in the same period of 1970. Ore milled, on the other hand, is up from 283.800 to 385.000 tons.
Since the issue of the June quarterly on July 15 Morchison shares have dropped from 405p to 240p.

The working profits for the Anglo-Vaal group gold mines are offered, each worth some £18.3m

There are already coonections between tha two companies. BET has a 43 per cent minority stake in United Transport Overseas, the mein operating auhsidiary of UTC. and they are equal partners in Jamaica Omnibus Services.

It appears that BET considers a takeover of UTC would he a straight expansion move and that there would he little opportunity for integration end rationalisation. One reeson for the hid is possibly that BET would rather not remain as a minority partner. not remain as a minority partner in UTO.

The offer will be accepted and recommended by the K and S directors. Company Developments has received confirmation that holders of 46 per cent. of the Ordioary shares intend to accept.

Company Developments intends

Company Developments inteod to continue to develop and expend the existing husiness of K and S and to retain existing staff and executive directors.

## Agreed £1.6m. UBM bid for B. Finch

United Builders Merchants is for B. Finch (Holdings), huilders merchaots and engineers. The Board of Fioch intends to accept the 45p a share cash offer in respect of 9.9 per cent. of the equity, and in eddition UBM bea acquired the 33.1 per cent. previously beld hy Argo Caribhean, the Bahamas-based bolding compaoy whose chairman is Mr. Devid Rowland.

Argo emerged in July 1976 ea

Argo emerged in July, 1970, et the, mystery huyar which had been building up a stake in Finch. This buying in the early pert of 1870 prompted tha Finch Board to revalue its assets—this threw up a net asset value of 43p a abare, more than double the previous hook fears. vious hook figure.

A 35p a share cash offer for the Preference capital of Finch is

also being made.

UBM says it is the continuing policy to develop the supply of materials through its own ware-houses. Finch hes lerge modern warebousing facilities at Barking-side, Essex.

The proposed acquisition by UBM of Rycroft (Bradfordi recently announced is in pursuance of the same policy in relation to UBM's sperations in the north of

# SENTRUST BEPERK

# Review by the Chairman

-Mr. W. B. Coetzer

(Submitted together with the 1971 Annual Report) The twenty-fifth annual general meet-

ing of Sentrust Beperk will be held in Johanneahurg, on November 5. The following is the Review by the Chairman, Mr. W. B. Coetzer, submitted together with the 1971 Annual Report.

FINANCIAL RESULTS

The consolidated net profit after tax The consolidated net profit after tax for the year under review amounts to R2 375 000 or 13.1 cents per ahare. Losses reelised from the sale of investments amounting to RSIS 000 are covered by a transfer from the reserve for possible future losses on the sale of investments and are therefore not taken into account in the abovementaken into account in the abovemen-tioned figures. Dividend income at R2 027 000 was R59 000 lower than the previous year. Reductions in the dividend rates of the Buffelsfuntrin and Free Slate Geduld mines logether with the continuation of the diversification programme were meinly responsible

for this decrease. The dividend rate was maintained at 11 cents per share.

INVESTMENTS

The consolidated halance sheet values of the quoted and unquoted shares were respectively R32 562 000 and R1 917 000 hoth heing higher than the previous year by R1 227 000 and R158 000.

The market value of quoted invest-ments amounted to R29 592 000 which was R3 519 000 or approximately 13% higher than the previous year. Taking this into account, the asset value was 187 cents per share at the end of the

Our original policy of diversification bas now reached an advanced stage as is reflected in the following table which is based on the market value of quoted investments and the book value of other investments:

.uf. Total 1967 1968 1969 1970 1971 42.1 34.1 21.6 17.6 18.7 & Assets Gold Producers Uranium

Producers 39.9 31.9 24.5 19.6 15.1

Other Commerce, Industrial

Minerals .. 7.1 9.1 12.5 18.3 16.6 Properties . 5.7 8.0 11.6 14.3 13.3 5.1 10.7 27.1 27.0 39.5

and Financiel ..... Net Current

Assets and Sundries \_ 0.1 6.2 2.7 3.2 (1.2) At the end of the financial year the investment in quoted gold and uraninm producers constitutes 30.6% of total investments, egainst 80.6% in the 1967 year, with a corresponding increase in the financial, industrial, property and

year, with a total investment in gold hase mineral aectora.

Although the total investment in gold and uranium producers has now decreased to an acceptable level, the portfolio held in this sector is still unhalanced as the investment in two producers, Buffelsfontein Gold Mining Company Limited and Free State Gcduld Mines Limited, still forms 58.3% of this aector. As in previous years the two investments were again substantially reduced as opportunities arose and this policy is heing continued. The directors of Buffelsfontein bave recently announced that as a result of heavy capital expenditure over the sbort term as well as reduced over the sbort term as well as reduced over the sbort term as well as reduced over the sbort term as well as reduced. result of heavy capital expenditure over the short term as well as reduced profitability, medium term cash shortanes are foreseen which will oblige the company to reduce its dividend rate considerably. This will also cause a material reduction in your company's dividend income.

NEW BUSINESS NEW BUSINESS

Full details of the company'a quoted investments and of changes in the portfolio during the year appear elsewhere in this report. R6 231 000 was realised from the sale of investments and R7 957 000 was invested in new lovestmenta. The most important changes in the composition of the portfolio were the increase of the sector "Commercial, Industrial and Financial" from 27% to 39.5% and the further decrease in investments in gold and uranium producers.

New investments included the acquisition of 170 000 sbares in Alpha Free State Holdings Limited. The most important unquoted investment acquired during the year was a hlock of 200 000 sbares in Finansbank Beperk acquired for a consideration of R125 000. This bank will do business mainly as a business and investment

The investment in Klerksdorp Record (Pty.) Ltd., a wholly owned subsidiary, was sold for R250 000

FUTURE PROSPECTS

The hook value of aome of the higgar gold mining investments which wers taken into account at market value at the time of the merger with six other investment companies in 1966, as well as the hook value of some of the investments acquired since, still exceed the market values considerably. Whilst in previous years, amounts were transferred from profits, and especially profits on the cealisation of

especially profits on the cealisation of investments, to a reserve for future losses on sale of investments (and at present there is atill an amount of R1 350 000 in this reserve), these book loases are to some extent an inhibiting factor in the management of the portfolio. This fact has elready ecceived considerable attention from your directors and will receive further attendirectors and will receive further atten-tion with the re-considering of the company's policy. As the short-term future of gold mining share prices may be rather uncertain and hecause of the imhalance which still exists in the port-fulio cegarding certain very large investments, your directors bave decided that it will be advisable to plough beck largar amounts which will result in a lower level of dividend distributions until such time as revenue from other investments has moved to a higher level. An annual dividend rate of the order of 9 cents per share is envisaged for the fore-

This concludes my review of the com-pany's affairs for the past financial year and I wish to extend my thanks to General Mining end Finance Corporation Limited for services rendered as managers and secretaries as well as to my fellow directors for their co-operation and assistance.

secable future.

STATEMENTS

# INTERIM STATEMENT

INTERIM

First half of year 1971

- The substantial increase in new premiums for ordinary life business has continued.
- Premium income for pensions business has been maintained in spite of uncertain conditions.
- The key feature of general business has been the achievement of planned expansion both at home and overseas — premium income in the UK is nearly 30% higher than for the same period last year.
- At home, there has been considerable growth in the volume of private car insurance business.
- An interim dividend of 3.85p (1970-3.75p) per 5p share made up of an interim ordinary dividend of 3.1p (2.917p) and an interim special dividend of 0.75p (0.833p) will be paid on 1 December 1971.

Copies of the full Interim Statement may be obtained from the Secretary, Legal and General Assurance Society Limited, Temple Court, 11 Queen Victoria Street, London, EC4N 4TP.

THE CLEARING banks have agreed to give their staff an extra day's holiday this Christ-mas in line with the recent Govarnment recommendation.
Mr. Claude Smith, leader of
the Banking Staff Council, said last night that following a request from the BSC, the banks had granted an additional day'a boliday to be takan either on Christmas Eve or on Tuesday December 28 where possible. Timing of the extra day is to

be at the descretion of local man-agement and where It is not practicabla to attach the extra day to the Christmas boliday it should be taken before the end of January.

## 'BROADCASTING COUNCIL' URGED

The Institute of Journalists, at its conference in Malta, yesterday called for the setting up of a body to bear complaints against radio and television authorities. Falling this, delegates decided, the powers of the Press Council should be enlarged to enable it to bear complaints against radio and television. Mr. Henry Russell Douglas, a leader writer on the Sun, was elected president for 1972.

## DISPUTE HALTS SCOTTISH PIT

Production at the Cardowan Colliery, on the outskirts of Glasgow, was halted yesterday when some 200 underground workers refused to comply with a mangement request that some of the men should change to working in another section because of geological conditions. The colliery employs 1,400 men.

## DR. A. H. REEVES DIES AT 69

Dr. A. H. Reeves, inventor of the pulse code modulation tele-phonic system, died yesterday. He

Dr. Reeves was still engaged in research work although be had retired from Standard Telecommunications Laboratories, where he had been since 1923, at the end of last year. He had registered his own company and was carrying out work for the British Post Office on optical communications systems.

# The 'no hands' phone

This is the phone that leaves you with both hands free to take notes, search through papers or refer to plans and drawings while you're using it. It's called the Loudspeaking Telephone 4 and can be connected to exchange lines and many extension systems. It sits a foot or two away from you on your desk and you simply talk towards it.

# For conferences

Its loudspeaker and microphone are powerful and sensitive enough for others around you to hear easily what is said and to add their comments in normal tones. You can cut off the microphone too, for confidential asides that the other end should not hear.

## For privacy

Lifting the built-in ordinary handset automatically cuts off the loudspeaker and sensitive microphone and leaves you with a normal phone.

# Expensive?

Not as expensive as it looks. The additional charge for connecting it to direct lines or a wide variety of extension systems is only £3 and the extra rental (minimum term one year only) works out at less than 60p a week.

# For further information

Ask your secretary to send for our colour brochure. All she has to do is ring the operator, ask for Freefone 888 and speak to Business

# A long-term use for coal

David Fishlock, Science Editor, describes research into the setting up of an economic "coalplex"

and chemical complex feeding on coal. The past year or so. he said, had seen a number of important developments in the more fundsmental aspects of this

Coal, as a chemical feedstock, is sadly bandicapped in comparison with oil. For the chemist hydrogen-to-carbon ratio (0.8: 1) is much less convenient than oil's (1.8: 1)—either he put in some hydrogen to redress the halance. Also, coal is a solid and clumsy to handle.

## **Impressed**

All efforts to harness coal as a eedstock have centred, therefore, on the liquefaction of coal as the first step. The Americans after the second world war were

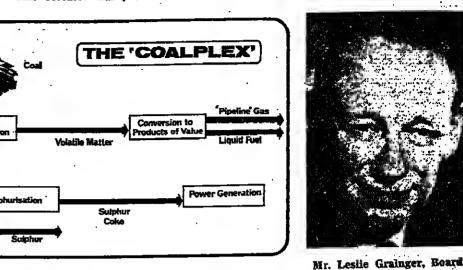

funds to spend with industry on assured his audience, had not is in some ways the converse of new and improved uses for coal. undermined his belief that the to explore were cnal-to-oil and coal-to-gas cooversions. Its re-

to explore were charto-off and coal-to-gas cooversions. Its research programme, heguo from scratch and to which \$79m, has so far heen committed, has helped such companies as Kellogg and Consolidated Coal to pursue the problems of the liquifaction of coal.

Meanwhile, the National Coal Board here has pursued other mental research deliberately posths relevant to the "coalpex." One is the fluidised-hed method of combustion, designed to harness heat from coal directly to a gas turbine, hypassing the clumsy steam-ralsing cycle. It looks much more likely than U.S. efforts to feed a turhing different routes to the same basic conversion problem, the British "coalplex," If and when different routes to the same basic conversion problem, the British "coalplex," If and when solvent work concentrates on detailed studies: on explaining the effects of different solvents and conditions, on variations in the feedstock, and in the products of the f

"COALPLEX" is a word of which we shall be hearing a great deal if the National Coal Board has its way. It could hold the key lahoratories at Leatherhead the legion to run low and nuclear power dominstes the demands of power generation.

In his Coal Science Lecture in London this week, Lord Robens, In former chairman of the National Coal Board, portrayed a hrave new world for cosl. Central to his theme was the idea of the coal many products akin to existing the experiment of the possible mixes. The outcome would probably be plant complex "considerably mixes" than complex "than complex" than sophisticated and complex" than sophisticated and complex than sophisticated snd complex" than constal refinery sites. This would afford access to Nurth Sea pipeline terminals, both as a source of process hydrogen and as an outlet for what the Americans complex is probably the major step in any optimal coal-to-oll or coal-

after the second world war were deeply impressed by war-time German achievements, and embarked on a spectacular coal-to-harked on a spectacular coal-to-plant in Louisiana. It ran up a bill exceeding \$100m. before President Eigenhower cancelled the experiments in 1953.

By then coal scientists had learoed two things. First, that oil from coal would not be competitive with oil ltself for at least two more decades. Secondly. that by that time they would be able to make a much better job of conversion.

In 1960 the U.S. Governments in Washington, with funds to spend with Industry on new and Improved uses for coal.

# Narrow gap

The man who will bring about a British "coalplex." If and when it comes, ls Leslie Grainger.

# Philips lighting puts colour in the shadows.

You can play a lot of tricks with light. And some of the tricks will surprise you. But one of the most surprising tricks is to shine light on an opaque object . . . and get a coloured shadow. Then fade out one light, fade in another and the shadow changes colour.

Coloured shadows open up a whole new world of opportunities for display. They inspired us at Philips to create a highly sophisticated form of dynamic lighting; the display lighting of the future that's going to bring brilliant new life to exhibitions, shops and shop windows with its constantly changing light and coloured shadows.

This is just one of our many dramatic developments. We created tungsten-halogen

auto bulbs for greater safety in night driving; fluorescent tubes with a score of 98 out of 100 for colour rendering (and that's about as perfect as you can get when you realise that the human eye can only discern a difference of 4 units so anything above 96 is as good as 100!).

Why not take advantage of the expertise of Philips internationally recognised lighting advisory service? It's designed to help you plan complete lighting schemes in buildings, sports stadia, on the roads or wherever good lighting is vital. (And where isn't it?) Write to us at:

Philips Electrical Limited. Lighting Division, City House, London Road, Crovdon CR9 3QR.

We want you to have the best. PHILIPS

# Reed Medway make a bed. And a tea chest. And a swimming bath locker.

Manchester Office 1. Geoper Street, Manchester, M2 2EW Jel 1061

# They all look a lot like this!

Reed Medway have come up with a whole new range of special paper sacks - custom built for outstanding versatility in hundreds of new applications.

We make a disposable paper sleeping bag, for example (with a layer of expanded polystyrene to keep out the cold). We make a paper sack for furniture removers too (it's easier to handle than the old-fashioned tea chest). And we make a paper sack for holding swimmers: clothes safely and hygienically at pools.

But that's only the beginning. Reed Medway sacks in a variety of plies, linings and finishes are used to pack products as different as plastic plumbing fittings, pre-packed potatoes, chemicals, playballs, cattle feed, ironing boards, pre-mixed cement,

rose trees and rolls of cloth. Probably a Reed Medway paper sack could make a better job of packing your product too. It could probably save you money and labour, it would certainly be tailor made to protect your product. And remember - wherever they travel, Reed Medway papersacks can carry your name. Just write or telephone In particular, it would have fifth main division within Reed to find out. We have a lively research and development accounted for 86 per cent. of team who will find the answer for you.

Reed Medway Sacks Ltd. Larkfield, Maidstone, Kent. Telephone: (Maidstone) 0622 7-7777.

Reed Medway put more into paper sacks.

against this stumbling block in an even worse way than do consumers. Disposing of dispusables has to be solved.

Perhaps, in the end, soluble of the disposable field, adver- much the same ills as these paper is the answur. That, counbined with short-life, use-again said, most of the brands on price is 33p for a two-roll pack. The newest comes from sale, whether private label or Housewives expect to pay 10p Scandinavia. Libresse is the national advertiser, stand up to for two rolls.

Using has heen dropping better-known, bigger market products of non-woven fabrics, steadily over the past years be linas. Disposable tableware is The first soluble product to be cause it is so difficult to find worth more than £5 m in manumade over here, by Soluble a promotional peg of the kind for two rolls.

you pack them, they take up a shaped boxes—like the Kleenex Here again, the price is to he ground. Tissues of all kinds— be largely consumer-oriented, muchinery and being sure that

## TIMBER INVESTMENT Swaziland and Southern Africa

World demand for forest products is rapidly out-stripping currantly available sources of supply.

Convery to belief, timber is not a long tarm investment in Southern Africa. Apart from the phanomenal growth obtained. If the cycle is geered for pulpwood and mining timber, on a 7-year clear felling rotation.

Based on present values, a return of 20% per annum on capital invested

rage, so section of available properties are:—
3 acres at £8:0:0 per acre undeveloped 
3 acres as £14:0:0 per acre undeveloped

SOUTH AFRICA
3.600 acres of £22:0:0 per acre undevaloped
6:000 acres of 75% developed
Yleiding of approximately 12% rising to 25% within S years
Price: £340,800,00.

P.O. Box 41385, Craighall, JOHANNESBURG.
